SCOUT SPECIFICATION ADDS A RUGGED ELEMENT TO THE SKODA KAROQ MID-SIZED SUV...

David Miles (Miles Better News Agency) test drives this newcomer.

The Karoq is Skoda's range of mid-sized SUVs available from £21,945 to £33,375. This wide range of prices covers petrol, diesel, manual, automatic, 2WD and 4WD models. Competitors are numerous in this mid-sized SUV sector and include the Dacia Duster, MG GS, Seat Ateca, Peugeot 3008, Ford Kuga, Nissan Qashqai, VW Tiguan and Suzuki Vitara.

The Karoq has a practical range of engine options including the turbo petrol 1.0 litre 115 hp TSI, the 1.5 TSI 150 hp and just recently added the 2.0 litre TSI 190 hp petrol unit. For those customers who still want diesel power there is the choice of 1.6 litre TDI 115 hp and 2.0 litre TDI 150 hp units. All are new EU6d-TEMP emission compliant engines. The choice of engine depends on the specification level chosen and in ascending order these are SE, SE L, Scout, Sportline and Edition.

The compact or mid-sized Karoq entered the UK market early in 2018 and is positioned in size below the Skoda brand's highly rated Kodiaq large SUV. Later this year Skoda will introduce their smaller City SUV called the Kamiq.

Skoda has introduced the 2019 model year Scout version of the Karoq following the theme set by their robust looking Octavia Scout and Kodiaq Scout derivatives. The Scout design and specification adds a purposeful off-road look and is aimed at the driver who wants to venture further off the beaten track. Like its bigger siblings the Karoq Scout offers four-wheel drive as standard.

The Karoq Scout is available with two engine choices. These are the 1.5 TSI petrol unit with 150 hp in combination with a seven speed DSG auto gearbox priced £30,650, or the 2.0 TDI 150 hp turbodiesel unit priced at £31,290 with a six speed manual gearbox and £32,590 if the seven speed auto transmission is preferred.

Over other Karoq versions the Scout gains chrome and silver-coloured bodywork elements, protective wheel arch linings and anthracite 19-inch 'Crater' alloy wheels. With their low profile tyres the wheels look good but in practise I worry they could easily be scuffed and damaged driving in off-road conditions. The lack of depth in the tyre side walls does make

the ride on-road firm and poor in-town where damaged road surfaces caused the handling to be fidgety. On the open road with less potholed surfaces the ride comfort improved but it's still on the firm side.

The rugged and robust exterior styling appearance continues with front and rear bumpers having integrated skid plates for further protection. There is the £150 option Rough Road package as well, providing more under-body protection for off-road travel. Disappointingly the ride height has not been increased over other Karoq models so that could limit off-road driving capabilities. Silver coloured door mirror casings complete the Scout's exterior design package.

WHEELS-ALIVE!

www.wheels-alive.co.uk

Inside the seats feature bespoke fabric covers with black-brown contrasting seams. All seats are embroidered with Scout lettering. The multifunction leather steering wheel, aluminium pedals and an LED package which includes ambient lighting completes the standard equipment and the standard driving mode selector includes an off-road setting.

Like other Skoda models the Karoq Scout has several other 'Simply Clever' ideas and

storage options. The electric boot lid with tip-to-close function opens and closes at the push of a button or by pulling gently on the open tailgates and a 'virtual pedal' under the rear bumper allows the fifth door to be opened with a simple wave of the foot. Skoda also offers a variable floor for the boot, storage nets on the front seat backs and the neat centre console design has several storage compartments. Centre of the fascia is the Amundsen sat-nav system with its 8-inch touchscreen with voice control and integrated Wi-Fi Smartlink connectivity. Thankfully the vehicle has its own separate heating and ventilation controls which are not operated via the touchscreen. The spec also includes heated front seats, DAB radio and Bluetooth, dual zone climate control, cruise control with speed limiter, front and rear parking sensors, rear camera, front assist radar and automatic braking, LED headlights daytime driving lights, cornering fog lights and rear lights.

My £31,290 2.0 TDI manual test car also had the very useful £275 heated windscreen and washer nozzle option as well as the must have steel space-saver spare wheel which costs £150. An electrically folding tow bar was also included and that adds another £855 to the price. Other options available include a £375 Virtual Cockpit layout with a 10.25-inch digital display, a £1,258 Columbus updated sat-nav system with a 9.2-inch touchscreen and the £1,000 Dynamic Chassis Control with even more driving and grip modes.

Skoda's 'Simply Clever' motto continues with the design of the rear seats, making the Karoq a versatile family or load carrying compact SUV. It has three individual rear seats, each slide fore and aft to increase or reduce legroom and still leaves a boot space of 479 to 588 litres (16.91 to 20.76 cu.ft). With the three rear seats folded down it goes up to 1,605 litres (56.68 cu.ft). They can be removed altogether to maximise load carrying space to 1,810 litres (63.92 cu.ft) which in the case of the Scout version could mean loads of extreme-sports activity equipment.

The 2.0 litre TDI 150 hp turbodiesel engine in my test drive model is well known throughout the VW Group of brands of Audi, Seat, Skoda and VW. It is the core workhorse unit, ideal for strong performance and high mileage fuel economy. It can be slightly noisy but once underway its soundtrack diminishes. It has a healthy 340 Nm (251 lb) of torque from 1,750

rpm but due to its higher fifth and sixth gear ratios with the Karoq Scout it needs to be kept at least at that rpm level or above, otherwise it wasn't that responsive unless a lower gear was selected. I found it prone to stalling in certain driving conditions such as a low speed rolling start at road junctions. I've always found this engine to be better suited for driveability mated with the seven speed DSG twin-clutch auto transmission; it's just a bit smoother than the notchy gearchange of the six speed manual gearbox. There is the Drive Mode Select function which gives Normal, Sport and Eco modes plus an Individual mode and 4WD version have additional Snow and Off-Road modes for low traction driving conditions.

Photo by David Miles.

Top speed is 121 mph with zero to 62 mph taking 8.9 seconds. The new WLTP Combined Cycle fuel consumption figures range from 42.8 to 44.1 mpg and my week of test driving returned an average of 40.2 mpg. With CO2 emissions of 134 g/km the new First Year diesel rate VED road tax cost is £530 followed by the £145 Standard rate. Company car drivers will pay 34% Benefit-in-Kind tax. Insurance is Group 15E and warranty is the usual VW Group's ungenerous three years/60,000 miles.

VERDICT

Overall the Scout versions of the Karoq are hard to justify price wise against other less costly 4WD versions. For instance the only slightly lesser specification SE L version with the 1.5 litre 150 hp turbo petrol engine with its standard auto gearbox and 4WD costs £2,785 less. If a diesel engine is a must then the SE L with the 2.0 litre 150hp engine, manual transmission and 4WD costs £2,145 less than my Scout spec model. The Scout doesn't offer anymore ground clearance than any other Karoq 4WD version so its off-road and on-road capabilities are the same and it has those hard-riding 19-inch wheels with low profile tyres which will suffer damage off-roading. The Scout only offers slightly more spec to suit the 'adventurer' for considerably more money.

For: Versatile mid-sized SUV, wide range of model options and prices, relatively roomy with the possibility of even more load space if the rear seats are moved, the Scout models are more visually suited to the adventurous owner.

Against: Scout models offer no more in the way of off-road performance than any other 4WD Karoq version, pricey against slightly less spec SE L petrol/diesel 4WD variants, notchy six speed gearchange, impractical 19-inch alloy wheels, ungenerous VW Group warranty.

Milestones and Wheels-Alive Tech. Spec. in Brief:

Skoda Karoq Scout 2.0 TDI 150 hp 4x4.

Price: £31,290.

Engine/transmission: 2.0 litre, four cylinder turbodiesel, 150 hp, 340 Nm (251 lb.ft) of torque from 1,750 rpm, six speed manual with multi-mode 4WD.

Performance: 121 mph, 0-62 mph 8.9 seconds.

Fuel consumption: WLTP Combined Cycle 42.8 to 44.1 mpg (40.2 mpg on test), CO2 134 g/km, VED diesel rate First Year road tax £530 then £145 Standard rate, BiK company car tax 34%.

Insurance Group: 15E.

Warranty: Three years/60,000 miles.

Dimensions/capacities: L 4,398 mm (14.43 ft), W 1,841 mm (6.04 ft), H 1,607 mm (5.27 ft), wheelbase 2,630 mm (8.63 ft), boot/load space 479 to 1,810-litres (16.91 to 63.92 cu.ft), braked towing weight 2,100 kg (4,630 lb), 5-doors/5-seats.
