PALM OIL of Today and Tomorrow

Palm-oil fuels

make drivers the top consumers of palm oil in Europe.

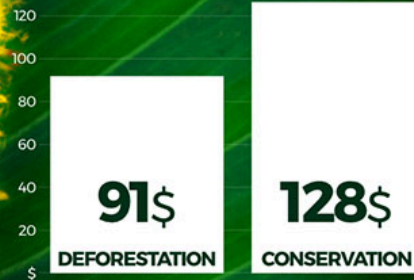

Sustainable 7%

Harmful 93%

What's really valuable (value per hectare/per year)

27 000 000 ha

Estimated size of all oil palm plantations in the world.

1 HOUR

300x

of forest cleared for plantations

~50 orangutans

per week are killed in the process of deforestation.

The growing pressures

oblige big palm plantations to reduce or stop deforestation, while some major companies are supposed to source only sustainable palm oil by 2020.

Products in your supermarket

LET'S DO IT TOGETHER

PKO, PKs
PHPKO
FP(K)O
OPKO
SDS, NaDS
...and more

Educate yourself on other names for palm oil and its derivatives

Avoid buying and consuming products which include palm oil

Support all the initiatives to **ban deforestation** and clearing of peatlands, and to strengthen provisions for workers' rights

Support the investments in **new generation** biofuels instead of biodiesel

Subscribe to platforms/forums focused on ecology and harm reduction

Download apps which will scan the products and **show you the ingredients**

information that you may find interesting about transportation and related environmental issues...

With the future of transportation and the environment very much in the news and of concern to us all, there is much information available on this link...
